

**FIGURE 1. GEORGIAN POTATO PRODUCTION AREAS DEFINED BY EXPERTS  
PRODUCTION REGIONS PROJECT REGIONS DEFINED DURING EXPERT ELICITATION.**

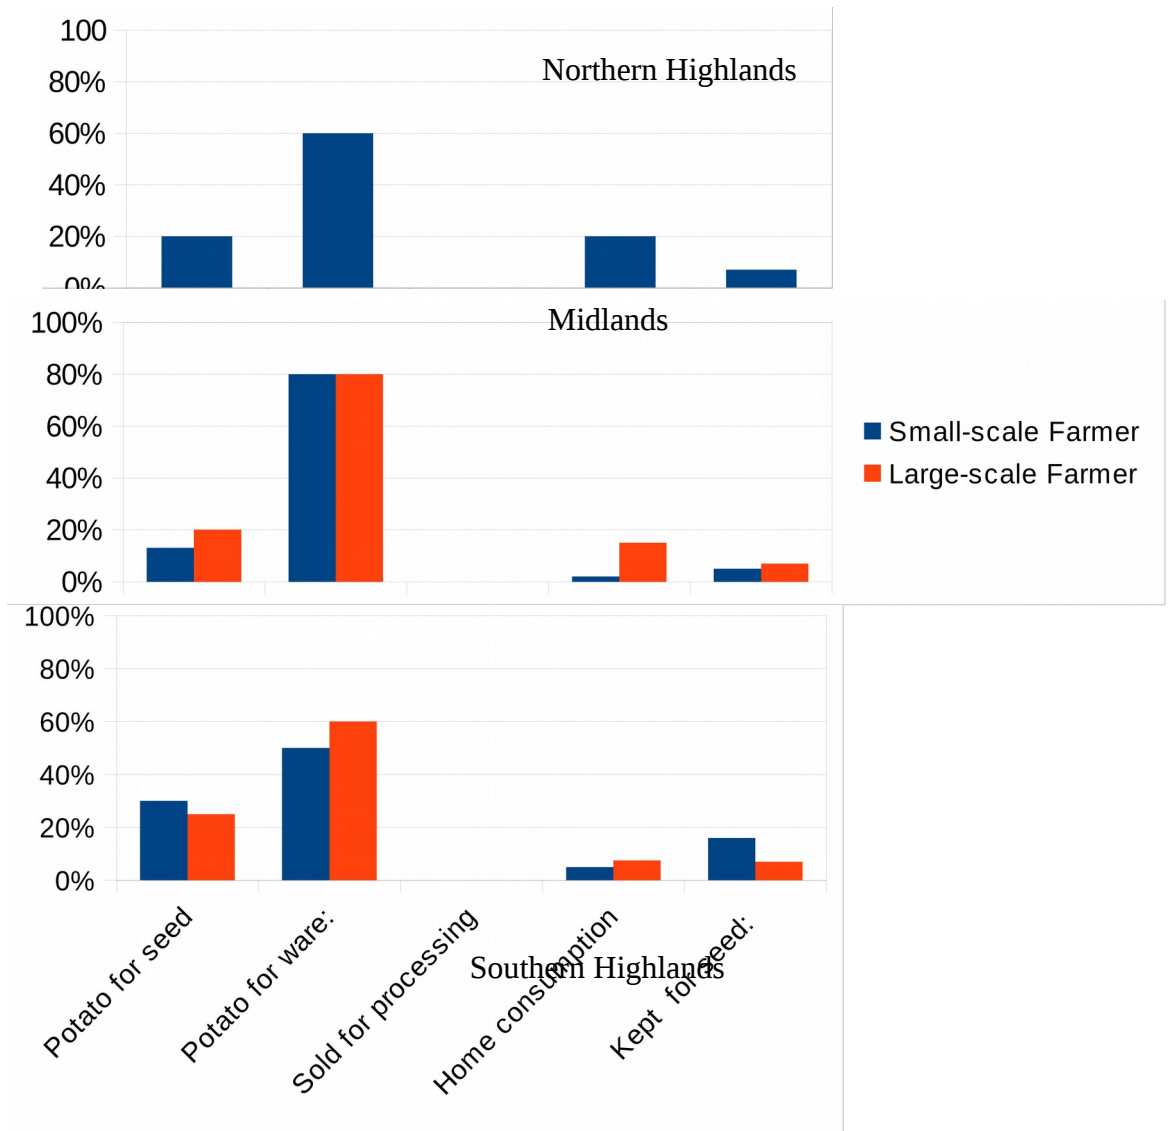

Figure2 Uses of potato by region and farm size

Figure 3. Potato seed sources and flows in Georgia. \*Local sources may acquire and sell seed across regional borders. For example, local sources in Midlands may sell seed from the south. Local sources also represents many types of sellers, including traders, markets and other farmers.

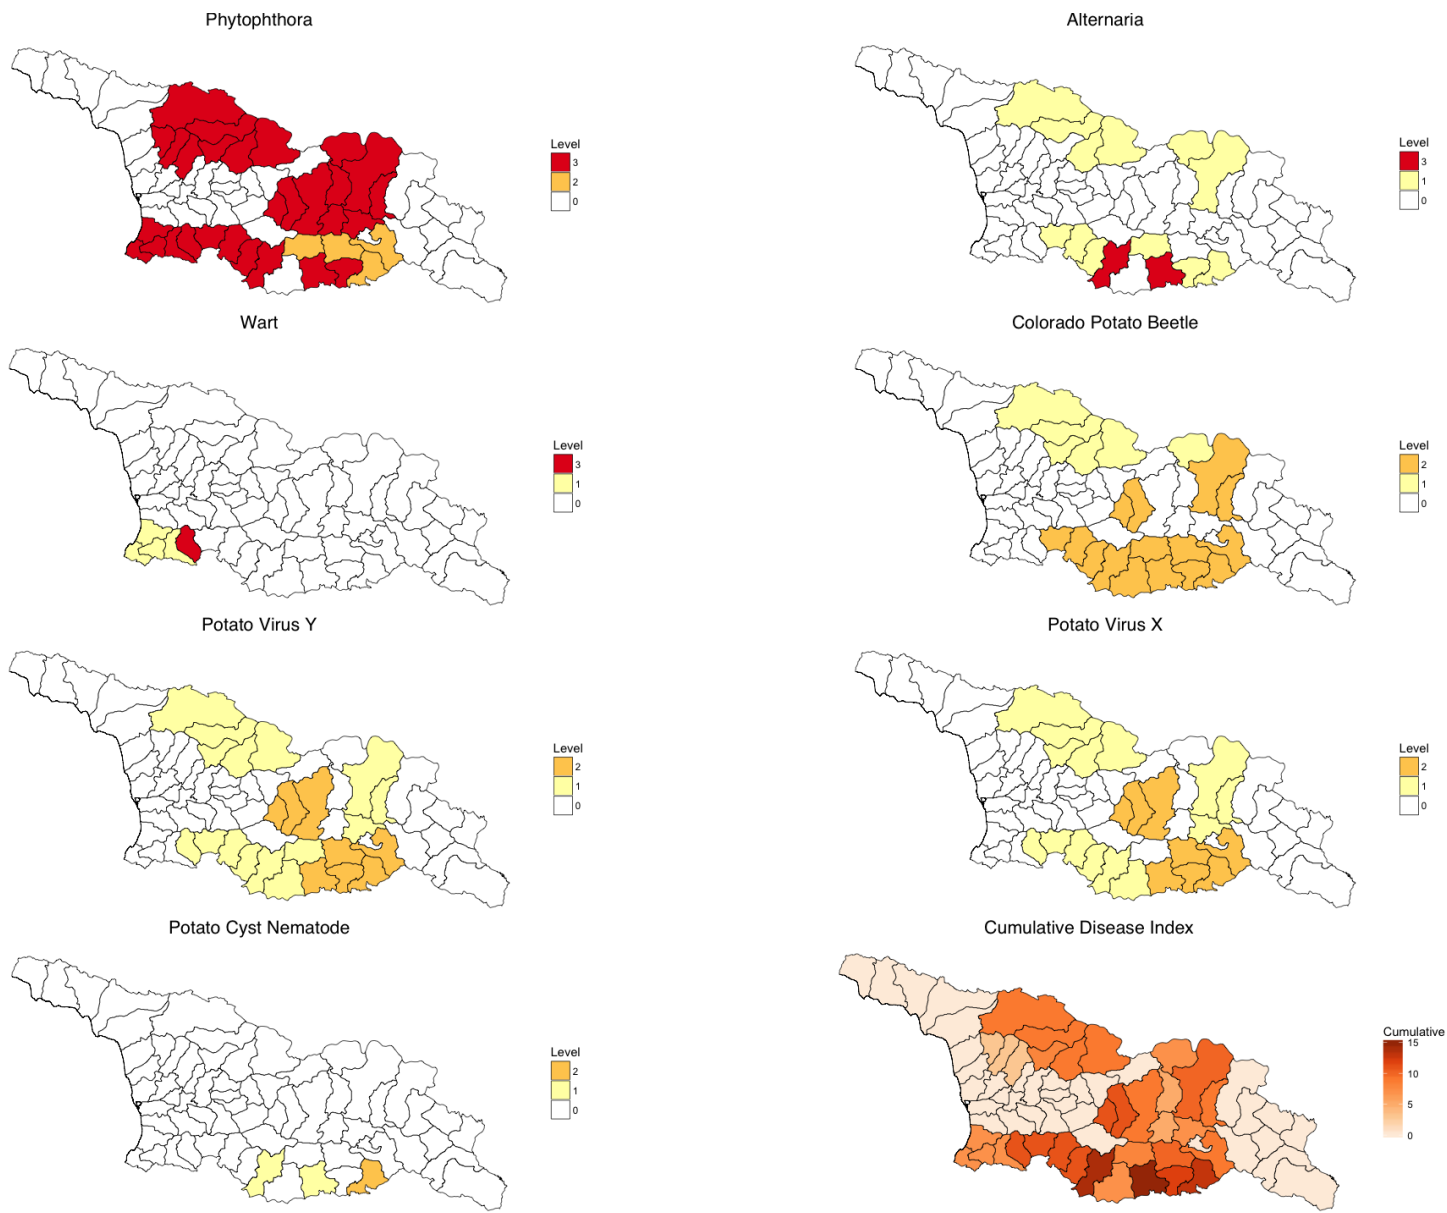

Figure 4. Reported distribution of major diseases and pests of Georgia. Administrative boundaries are represented at the district level. Colors represent regions where the disease is severe and causes substantial yield loss (red), regions where the disease is occasionally severe (orange), and regions where the disease is found (yellow).
